## Aboveground Storage Tank Installer

### Job Description:

- Coordinate with engineering and design team to complete upcoming projects
- Lead staff on installation of aboveground storage tanks, piping, and other equipment. Test them after installation.
- Ensures all field staff are adhering to safety policies and guidelines in compliance with OSHA practices.
- Communicate daily reports, photos, and documentation to engineering and design team
- Maintain schedules for workers and sub-contractors; Ensure product installation requirements are followed accurately and efficiently.

### Qualifications:

- Minimum Three (3) years' experience preferred.
- Understanding of aboveground storage tank systems
- Knowledge of applicable codes NFPA, State, and Local
- Ability to understand mechanical concepts and tank system drawings
- Experience leading and motivating a crew on one or multiple concurrent installation projects
- Ability to perform manual construction work and equipment operations

### Requirements:

- PA DEP AMMX AST-Manufactured Metal-Tank/System Installation/Modification license required
  - o Licenses for other installation categories beneficial
  - o Licenses for other states beneficial
- High School Diploma or equivalent
- Good oral and written communication skills
- Valid U.S. Driver's License
- Computer skills, Microsoft Word, Excel, and Outlook
- Ability to lift 50 pounds

Employee will be part of a multi-faceted team engaged in a variety of design-build storage tank installation projects. This position requires excellent communication skills, written and verbal. This employee will engage directly with clients individually and as part of a project team. This position will require some travel.

Salary is commensurate with experience. Somerset Engineering offers a comprehensive benefits plan including vacation time, holidays, health insurance plan, and participation in the company's 401K plan.
